Turf Management Packages

PACKAGE ONE

Application 1 – Early Spring (March/April) Balanced slow release fertilizer with pre-emergent weed control for crabgrass and broadleaf weeds

Application 2 – Late Spring (May/June) Micro-nutrient rich fertilizer with pre-emergent crabgrass and broadleaf weed control

Application 3 – Late Spring (May) Post-emergent broadleaf weed control

Application 4 – Summer (June/July) Lime application for a balanced soil pH

Application 5 – Late Summer (September) Time release fertilizer to help with summer conditions

Application 6 – Early Fall (October/November) High nitrogen fertilizer to slowly feed over the winter months

PACKAGE TWO

Applications 1-6 from package one

Application 7 – Summer (July) Grubb control to prevent these pests from over wintering and destroying the root system of your lawn

Application 8 – Late Summer (September) Post-emergent broad leaf weed control

PACKAGE THREE

Applications 1-7 from package two

Application 9 – Fall (September/October) Core aeration to open up soil for better water penetration and air circulation

Application 10 – Fall (September/October) – Overseeding of lawn for a thicker lawn
